

Daniel García Silva

Full Stack Developer · Frontend

I build complete web products: the interface people use, the API behind it, and the delivery that puts them in production. Seven years of frontend work, anchored in Angular and TypeScript.

EXPERIENCE

Frontend Developer · 42Labs Jan 2026 – present

Assigned to the business-area cell for Banco Santander: new features, maintenance, and migrations across its various projects.

Angular · TypeScript · RxJS

Front End Development Leader · QServus Apr 2020 – Jan 2026

Almost six years leading the front end of the survey platform, from its migration to Angular through to the AI agent interface.

- Migrated the legacy Django survey platform to Angular, improving its interactions and adding new functionality.
- Built and maintained the survey management and reporting platform.
- Front end for the specialised AI agent platform.
- Managed the Angular project across successive versions, as part of the technology innovation team.

Angular · TypeScript · RxJS · Firebase · Node.js

Front End Leader · ICOV Consultores Tecnológicos Asociados Oct 2019 – Apr 2020

Several web and mobile projects in parallel, supervising and supporting all development carried out at the client.

Angular · Vue · Ionic

Front End Developer · ICOV Consultores Tecnológicos Asociados Aug 2018 – Sep 2019

Tracking projects for the telecommunications and construction sectors, web and mobile.

Angular · JavaScript

TECHNICAL PROFILE

Frontend

Angular (7 years) · TypeScript · JavaScript · RxJS · React · Vue · Ionic · HTML · CSS / Sass · Astro

Platform and delivery

CI/CD · GitHub Actions · Jenkins · Git / GitHub · Google Cloud · Cloudflare Workers

Backend and APIs

Node.js · Python · REST · OpenAPI · JWT / OAuth 2.0 · Firebase · Java / Spring Boot (learning)

Quality and engineering

Unit testing · E2E testing · Agile methodologies · Fortify · WCAG accessibility · Three.js / GLSL · Web animations

SELECTED PROJECTS

ModelForge — A model compiler that turns JSON into TypeScript, Java, Spring Boot, C#, and Python, without the JSON ever leaving the browser. [modelforge.daniel-gs.dev](#)

DEEP Archive — An interactive astronomical archive of a thousand records, rendered in WebGL. [deeparchive-dg.netlify.app](#)
[github.com/DanielEFGS/deep-archive](#)

Strategy Lab — A laboratory for researching, running, and comparing quantitative strategies.

Features Angular v21 — A technical lab for putting Angular 21 through real conditions. [features-21.netlify.app/en](#)
[github.com/DanielEFGS/features-21](#)

Imperial Wolf — A corporate site for a private security company. [imperialwolfsecurity.cl](#)

EDUCATION

2026 **Computer Science and Engineering** — Universidad Andrés Bello — In progress

2015 – 2018 **Computer Programmer Analyst (technical degree)** — Duoc UC, Sede Padre Alonso de Ovalle

2017 **English certification** — TOEIC Bridge — Level B1

LANGUAGES

Spanish – Native · English – B1 · TOEIC Bridge
